

The Church Executive™ — Accounting Routines

Introduction

Accounting

Accounting tables have been incorporated into *The Church Executive*™ database. Data is recorded into these accounting tables in one of a few ways:

- < manually entered via an Accounting module (accessed via the **Accounting** button from the Main Switchboard).

These will typically be accounts payables (ie. office expenses, etc.).

- < posting a payroll entry
- < posting donations received from weekly services, then “deposited”

Accounting Settings

Look-up Tables

Accounting

- Chart of Accounts
- Accounting defaults
- Accounting years

There are several *settings* related to working with the Accounting module that need to be customized by your church.

Consider these *pre-requisites* to using the accounting module effectively.

These settings include:

- < defining your Chart of Accounts (see page 3). Typically, you will add new accounts as time goes on. However, an initial set of accounts is essential.
- < Accounting defaults (see page 4). To ensure that *posting* of data from other modules is placed into the correct accounts, various system-wide defaults need to be defined here.
- < Accounting years (see page 6). Determines the first and last days of each *accounting* year, which can be different from a *calendar* year.

Chart of Accounts

Accounts are assigned a 4-digit account code. The chart of accounts is maintained via the Look-up Tables module.

 Chart of Accounts

a from the Main Switchboard, choose the **Look-up Tables** button (**Alt-K**).

ã on the **Codes (2)** tab, choose the **Chart of Accounts** radio button (at the top of the second column).

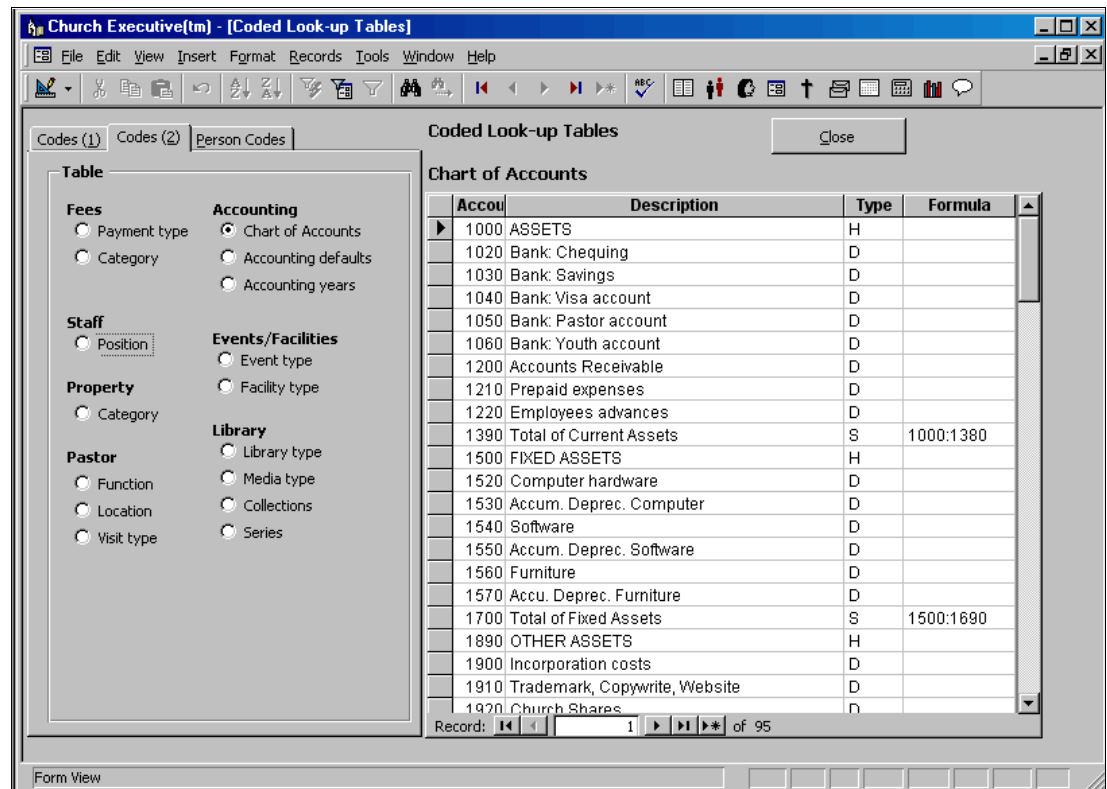

Figure 5
Chart of Accounts (your list will most likely be different)

- Account a 4-digit numerical code representing the account.
- Description a brief title of this account.
- Type a single-character letter code identifying the account type:
- | | |
|---------------|--------------|
| Header | Left |
| Detail | Right |
| | Sum |
- Only Detail-type or Left-type accounts can have transactions. Header accounts are for grouping and reporting purposes only. Sum accounts are used on a Trial Balance report to provide group totals. Right accounts are for summing left accounts only (ie. a sub total).
- Formula identify a formula for Sum-type and Right-type accounts. A colon (:) indicates a range of accounts to sum. A plus (+) or minus (-) are used to represent addition or subtraction of specified accounts. R-type accounts must only reference L-types in the formula.

Accounting Defaults

To ensure that *posting* of data from other modules is placed into the correct accounts, various system-wide defaults need to be defined here.

Accounting defaults

from the Main Switchboard, choose the **Look-up Tables** button (Alt-K).

Look-up Tables

on the **Codes (2)** tab, choose the **Accounting defaults** radio button (second item, from the top of the second column).

Codes (2)

A three-tabbed control presents the various defaults:

Accounting Payroll Cheques

Accounting tab

Accounting Year

what is the *current* accounting year? You must select an item from the drop-down list.

If a new year is desired that is not found in the drop-down list, it must be first be defined in the accounting years module (see page).

Year end

what is the *last date* (year end) for the current accounting year?

Accounts to post to...

five different types of *transactions* require the assignment of the their respective account codes:

- < accounts receivable
- < accounts payable
- < PST
- < GST collected
- < GST paid

For each, select an account from the drop-down list.

G/L Company default

from the drop-down list, select the vendor to be used as the *default* value for new general ledger entries.

Figure 10
Accounting tab control

Payroll tab

On this tab you identify the various accounts that different payroll items are *posted* to.

The list includes:

- < Gross salary (wages)
- < EI (employment insurance)[†]
- < CPP (Canada Pension)[†]
- < Vacation pay[†]
- < Employee advances
- < Income taxes
- < Benefits (such as group insurance)
- < Net pay (chequing account)

[†] requires *two* accounts (debit and credit)

	Debit	Credit (-)
Gross salary	5300	
EI	5310	2310
CPP	5320	2320
Is Vacation Pay accrued to end of year?	<input type="checkbox"/>	
Vacation pay	5300	2160
Advance		1220
Taxes		2330
Benefits		5340
Net pay		1020

Figure 11
Payroll tab control

Cheques tab

This tab is used to identify which *type* of cheques you are using:

- < not available
- < pre-made (as in those available from NEBS Business Products)
- < print all (the program will generate the *entire* cheque onto a regular sheet of 8½"x11" paper)

If Print all is selected as the cheque type, then *all* of the other fields on this screen are *required*.

Branch (1)	Branch (2)	Acct (1)	Acct (2)	Acct (3)
01234	001	123	456	7

Figure 12
Cheques tab control

Accounting Years

Accounting years

The accounting module checks the date of each new transaction against the *current* accounting years start and end date.

➤ from the Main Switchboard, choose the **Look-up Tables** button (**Alt-K**).

Look-up Tables

➤ on the **Codes (2)** tab, choose the **Accounting defaults** radio button (third item, from the top of the second column).

Codes (2)

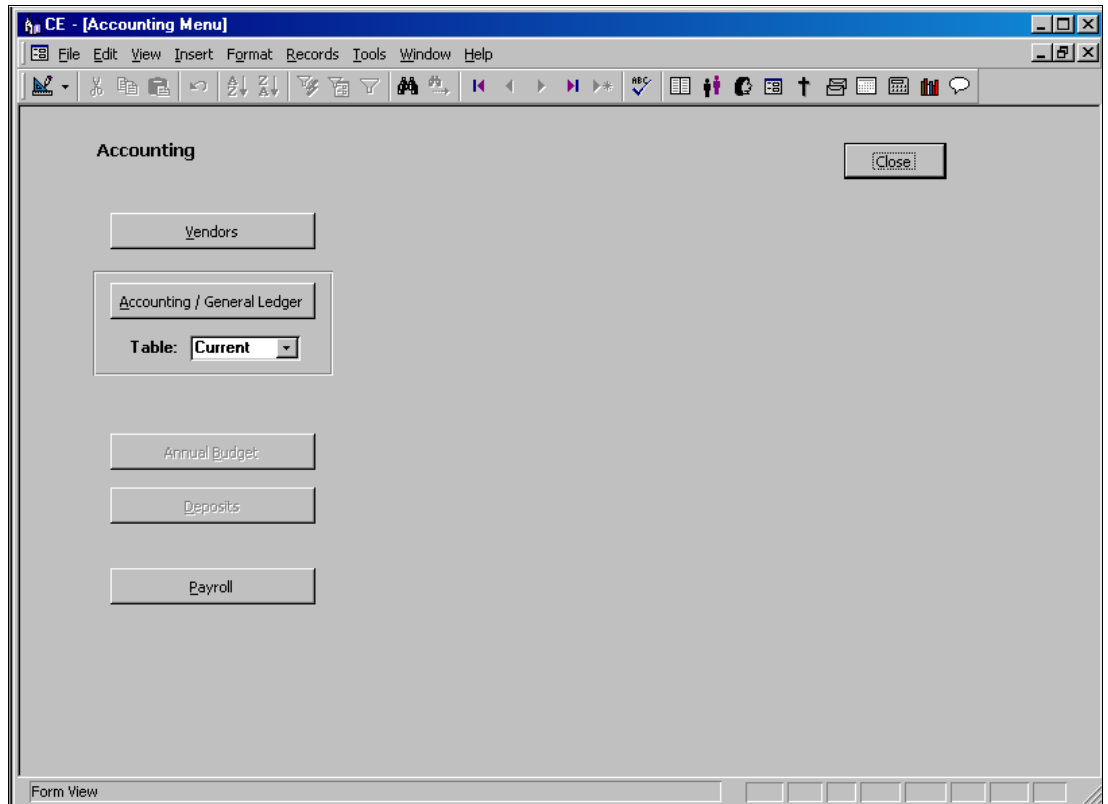

Accounting Years			
	AccYear	FirstDay	LastDay
▶	2003	01-Jan-03	31-Dec-03
	2004	01-Jan-04	31-Dec-04
*			

Record: 1 of 2

A *new* year is added to the blank row at the bottom of the list (the one with the asterisk at the left side).

Accounting Menu

Clicking the **Accounting** button from the Main Switchboard will display the *Accounting* menu:

- < use the **Vendors** button to identify the company, contact, and address information for each "vendor" to be used in the Accounting/General Ledger module (see page 8). GST reporting?
- < the **Accounting/General Ledger** button will access the main part of the Accounting routines (see page 12). You can pre-select the *accounting year* you would like to work with.
- < the **Annual Budget** button is used to work with the church's annual budget (see page).
- < the **Deposits** button is where daily (or weekly) monies are deposited (see page).
- < the **Payroll** button records all staff payroll entries (see page).

Vendors

Every accounting transaction — whether it be a general ledger journal entry, accounts payable, staff payroll or deposit — is assigned to a *vendor*. In some cases, the vendor is a company (such as the purchase of office supplies from a local store); in other cases, the vendor is a person (such as staff payroll); in others, it is your own church (deposits, for example).

In order for a transaction to be completed, a *vendor* must exist for the specific company (or person) in the Vendors table.

In order for a staff person to have a payroll entry created, a *vendor* must exist for this person in the Vendors table.

If desired, for each vendor you can identify an unlimited number of individual contacts.

The screenshot shows the 'Church Executive(tm) - [Vendors]' window. The form contains the following fields and values:

- Vendor Id: 2
- Company: Office Depot
- Contact: (empty)
- Street: 1596 Ness Avenue
- Mail: (empty)
- City: Winnipeg
- Prov: MB
- PCode: R3U 3W6
- Country: Canada
- Phone: 783-1329
- Fax: (empty)

Record: 1 of 1

Record: 2 of 3

Vendor/company number

Figure 19
Vendors form

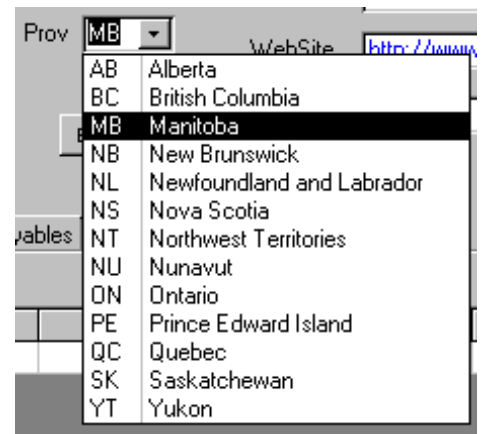

Vendor Drop-down Lists

There are a few *drop-down list* fields on the Vendor screen:

- < City
- < Province/State
- < Country
- < Area code

The drop-down lists are used to ensure that consistent information is entered into your database. As such, you are limited to choosing an item from the list (or none at all).

Pressing **F4** or **Alt-down arrow** will present the list of choices.

New items can be added to the respective drop-down lists at anytime, even as you are adding a new vendor. However, to speed up the process of adding new vendors, you may want to take a few moments *before* entering lots of information and jot down the most common or appropriate values for each of these fields and enter them into the respective lists. Since most vendors are *local*, it is quite likely that the most common values are already listed in your database.

Add new item

There are two ways to add a new item to a drop-down list:

- ➊ via the Look-up Tables module.

This method will likely be used shortly after you have installed the program and are getting ready to enter your data. It provides a convenient section where you can browse through *all* drop-down lists used throughout the program.

Tip: clicking the Look-Up Table icon on the Toolbar will open this module.

- ➋ double-click in the respective field to display a pop-up dialog box.

This method will likely be used periodically as you are using the program in the months and years to come. It provides the quickest way to add a new value to the field you are currently working with.

Illustrated to the right are the current values found in the Province drop-down list as viewed by double-clicking in the Province field on the Vendor screen.

- * A new value is added in the last row of the list, beside the asterisk.

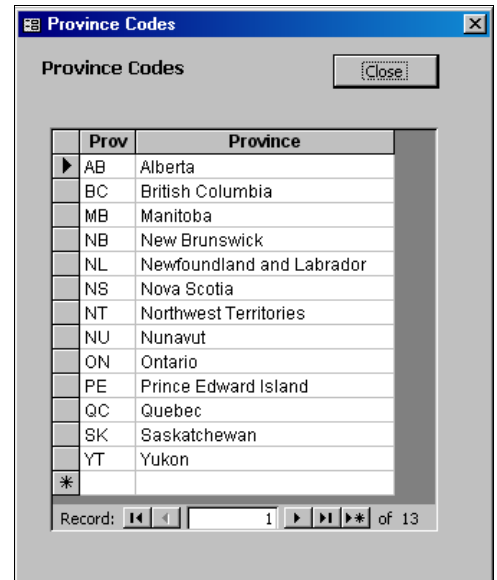

Figure 22
Province/State codes

Vendor Fields

The fields are listed in the order they appear as you **Tab** through the screen.

- Vendor id This unique number is assigned automatically by *The Church Executive*TM —
- Company The Company is the name of the company (vendor).
- Contact The full name of the main contact person at this company.
- Street Enter the street address for this vendor.
If the vendor *only* has a post office box or similar mailing address, it should be entered *here*.
- Mail If the vendor has a *second* line to their mailing address, it would be entered here.
Both the street and mail addresses are included on a mailing label or envelope.
- City This is a user-defined field that displays a list of allowable values in a drop-down list. You are limited to selecting an item from this list.
Pressing **F4** or **Alt-down arrow** will present the list of choices.
If you require a new city that is not shown in the current list of allowable values, you will need to *add* a new city to the list. See page 9 for details on doing this.
- Prov This is a user-defined field that displays a list of allowable values in a drop-down list. You are limited to selecting an item from this list.
Pressing **F4** or **Alt-down arrow** will present the list of choices.
If you require a new province/state that is not shown in the current list of allowable values, you will need to *add* a new province/state to the list. See page 9 for details on doing this.
- PCode The postal code for this vendor.
Lowercase letters are converted to uppercase when you leave the field. In addition, if exactly six characters are entered, a space is automatically inserted into the middle.
- Country Only required for *international* vendors, otherwise leave the country field blank.
Pressing **F4** or **Alt-down arrow** will present the list of choices.

This is a user-defined field that displays a list of allowable values in a drop-down list. You are limited to selecting an item from this list.

If you require a new country that is not shown in the current list of allowable values, you will need to *add* a new country to the list. See page 9 for details on doing this.

Phone The area code and phone number are two separate fields.  Phone 450 839-3948

Only enter an area code (from the drop-down list) if the phone number requires it when dialing, otherwise leave it blank.

If exactly seven digits are entered into the phone number, a dash will automatically be inserted when you leave the field.

Pressing **F4** or **Alt-down arrow** in the area code field will present the list of choices.

The area code field is a user-defined field that displays a list of allowable values in a drop-down list. You are limited to selecting an item from this list.

If you require a new area code that is not shown in the current list of allowable values, you will need to *add* a new area code to the list. See page 9 for details on doing this.

Fax If exactly seven digits are entered into the fax phone number, a dash will automatically be inserted when you leave the field.  Fax 773-3939

Toll Free Enter a toll free number for this vendor, if applicable.  Toll free 1 800 463-3768

Email The vendors primary e-mail address.  Email info@officedepot.ca Email

As you exit this field, a check is made to ensure the validity of the information that was entered. For example, every e-mail address must have the @ symbol.

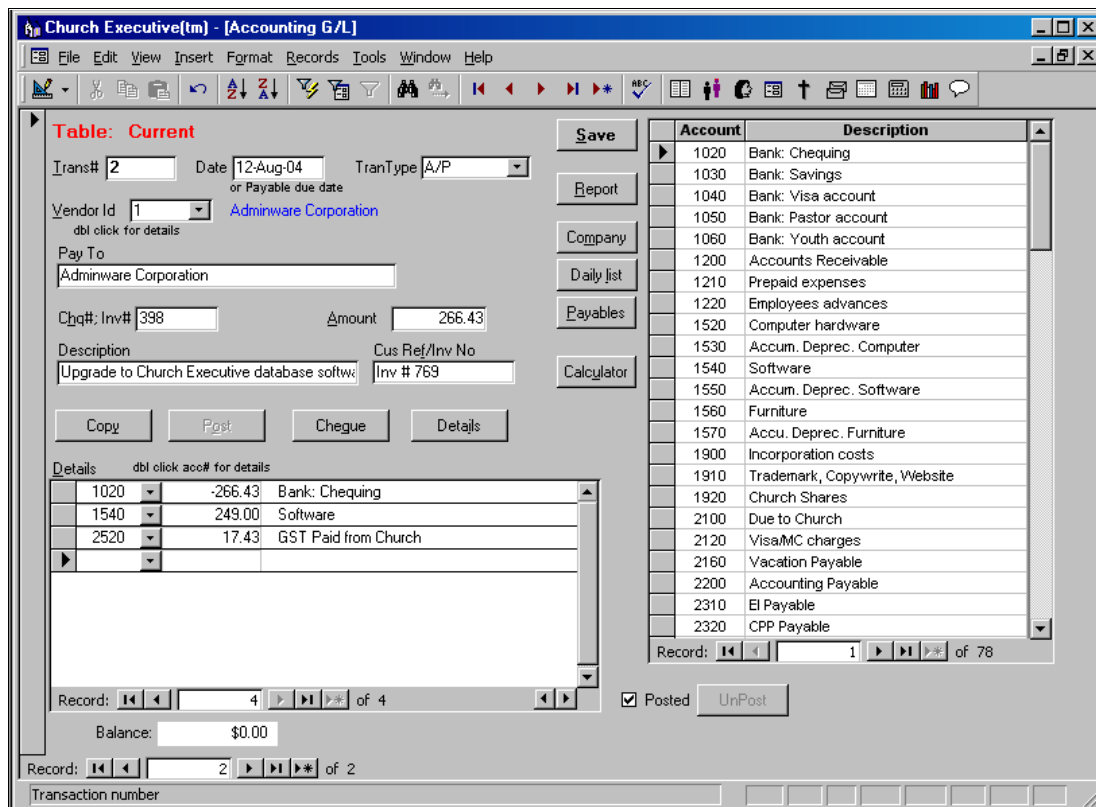

E-mail addresses for various individuals within the company can be recorded via the Employee contacts tab at the bottom of the form.

Website The vendor's website URL, as in:  Web site http://www.officedepot.ca/

As you exit this field, a check is made to ensure the validity of the information that was entered.

PO # If you have been notified of a purchase order number to be used on any correspondence with this vendor, you can record it here.  PO # 98390003

The Accounting module incorporates a number of features found in an off-the-shelf accounting program.

Options available:

- < the upper left portion of this screen is used to record the general information about this transaction.
- < the lower left side of the screen is used for the specific account **details** and breakdown of this transaction — there will be *at least two detail items* for each transaction, but as many as are needed can be entered.
- < the right half of the screen has a list of Left- and Detail-type accounts (see page 3 for information on the various account types..

Add a new Transaction

Each transaction is automatically date-stamped as to when it was added to the system.

Ⓐ the **Trans#** is *automatically* assigned by *The Church Executive™*.

Ⓐ **Date:** to insert *today's* date, press **Ctrl-;**

or Payable due date

When adding a new entry, if the Date is left blank, it will automatically be filled in with today's date after a vendor number is added.

Ⓐ the transaction type is one of 3 choices:

A/R	invoice
A/P	payables/cheque
Deposit	cheque deposited
G/L	general ledger journal entry

Ⓐ **Vendor id:** when you *leave* this field a number of checks are done:

dbl click for details

Pressing **F4** or **Alt-down arrow** field will present the list of choices.

- < If the vendor number does *not* exist in the Vendor table an appropriate message is displayed and the **Save** button is disabled.

To **add** a new vendor:

- Ⓐ double-click in the vendor id field to open the Vendors module
- Ⓐ add a new vendor within the Vendors module (see page 8).
- Ⓐ save the new vendor.
- Ⓐ return to the accounting module to continue working with the transaction you are currently creating.

If this is a *new* record, then...

- < the vendor's company is displayed to the right of the Vendor id field.
- < the **Pay To** field is filled in with a default: the Company name, if available; if not, then the vendor's contact name is used.

You can *double-click* on the currently displayed vendor id to open the vendor form to this vendor.

Ⓐ as noted above, a *default* **Pay To** is provided but this can be changed, if needed.

The name shown is looked up from the Vendor file based on the Vendor id: the Company name is used, if available. Otherwise the contact name is used.

Ⓒ enter the **Chq#; Inv#**.

- < numbers and letters are acceptable. However, in order to *print* a cheque, a numeric-only entry must exist.
- < Pre-Authorized Cheques should be entered as **PAC**
- < leave *blank* if a cheque is not applicable (ie. MasterCard or Visa payment; journal entry, etc.)
- < a *voided* cheque entry should be the original cheque# followed by a 'V' (for void).

If this is a *new record* and the new cheque# is *not* blank and the new cheque# contains only digits, then a check is made to see if the newly entered cheque# has been used already. If it is duplicated, an appropriate message is displayed and the **Save** button is disabled.

Posting from other parts of the program automatically assign:

- < **Deposit:** when deposit is done. Cheque reads 'Deposit'; Description reads 'Bank deposit for mm/dd/yy'
- < **Payroll:** when payroll is posted

è the total **Amount** of the payment.

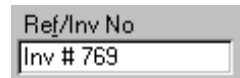

A screenshot of a form field labeled "Amount" with a text box containing the value "266.43".

'00' cents will be added automatically if only an integer is supplied (ie. there is no need to enter 'dot zero zero').

é a brief **Description** of this transaction. This field will print at the bottom of a cheque.

A screenshot of a form field labeled "Description" with a text box containing the text "Upgrade to Church Executive database softwa".

ê a client's **Ref/Inv No.** if applicable. This field will print at the bottom of a cheque

A screenshot of a form field labeled "Ref/Inv No" with a text box containing the value "Inv # 769".

Add Details

There must be at least two detail lines for each transaction. This is because the calculated Balance, shown just below the Details listing, must be *zero* — this can only happen when there are at least two details — one a positive and the other a negative.

Details			
dbl click acc# for details			
▶	1020	-266.43	Bank: Chequing
	1540	249.00	Software
	2520	17.43	GST Paid from Church
*			
Record: 1 of 3			
Balance:		\$0.00	

Posting

The Post button is enabled when all of the following are true:

- < not already posted
- < vendor id exists
- < date exists
- < amount exists
- < balance of details = zero

- Ⓐ type in an **Account** number or choose one from the drop-down list (pressing **F4** or **Alt-down arrow** will present the list of choices).

The drop-down list only presents *detail*-type and *left*-type accounts — these are the only ones that can be selected.

The **Description** is the associated description for this account code and is looked up automatically by the program. It is for a visual reference only — it cannot be modified here.

- Ⓐ enter the **Amount** to be placed into this account. Include a negative (minus sign) where applicable.

For example, writing a cheque is *withdrawing* funds from this account, so it is negative.

When you Tab into this field (and if an account number has been provided), a *default* value will be presented that represents the *balance* remaining on this transaction to give a zero balance.

If this is the *first* details entry and the account code is less than 1095 (ie. a Bank account), then the amount is automatically made a negative.

- Ⓐ continue adding more details until the Balance becomes zero.

Parentheses around the value indicates a negative amount.

- Ⓐ when you *leave* the Details section, a check is made to see if the **Post** button can be enabled.

Double-clicking on the account code in the details section will pop-up an Account Details listing.

Copy

The copy button is *disabled* in the following cases

- < TranType = Deposit
- < Chq# = Inv# nnn
- < Desc = Payroll

The **Copy** button is used to duplicate the current transaction (and all details) a specified number of times over a specified interval.

This is useful if you need quite a few post-dated cheques written for purchasing an item where payments are spread out over a long period of time. Or perhaps the same PAC entry is required over several months.

The new TranDate is incremented automatically by the Period that you have selected: weekly, monthly, or quarterly.

The new Cheque numbers are automatically incremented by one *if* the current cheque number is strictly numeric.

When you complete the **Do It!** and *leave* this form (ie. return to the Accounting form), you will be placed on the *first* copied transaction.

Post

The **Post (Alt-0)** button *flags* the current transaction as being posted so that it cannot be modified in anyway.

You will be prompted to confirm your desire to Post this entry.

Once Posted, the transaction cannot be modified in any way.

The Posted *flag* near the top of the screen will indicate the status.

Various checks are made on the current transaction to ensure that it is 'post-able'.

Rules to Post:

[the post button will not be enabled until all of these rules have been met]

- < must have a vendor id, date, amount, and account
- < balance of detail items must be *zero*
- < if the transaction amount equals zero then a confirming dialog box appears (this would be used only if you are needing to enter a voided cheque)
- < a cheque number is compared against the account: a *duplicate* is not allowed.
- < if the cheque number is *blank* **and** a detail item = 1020 or 1030 the transaction cannot be posted

Unable to Post:

If the Post button happens to be selected and any of the above rules fail to be fulfilled an appropriate dialog box message will appear, such as that shown to the right.

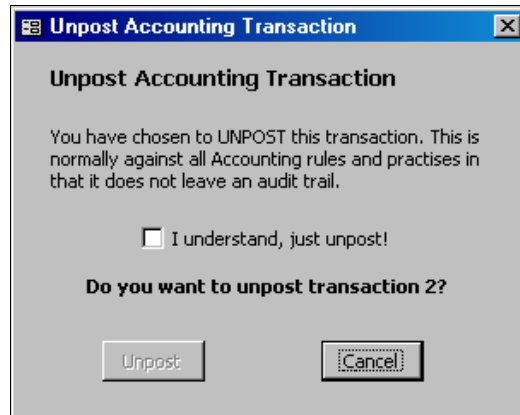

Unpost

Unpost

The **Unpost** button is used to *unpost* the current transaction so that it can be modified.

Under normal accounting practices, once a transaction is completed and posted it *should* be 100% finalized. If a mistake is found in the transaction then a *new* transaction should be created to correct the mistake.

However, *The Church Executive*TM does allow a transaction to be modified, as long as it is not posted.

The pop-up dialog box wants you confirm that you understand the implications of unposting the current transaction.

Cheque

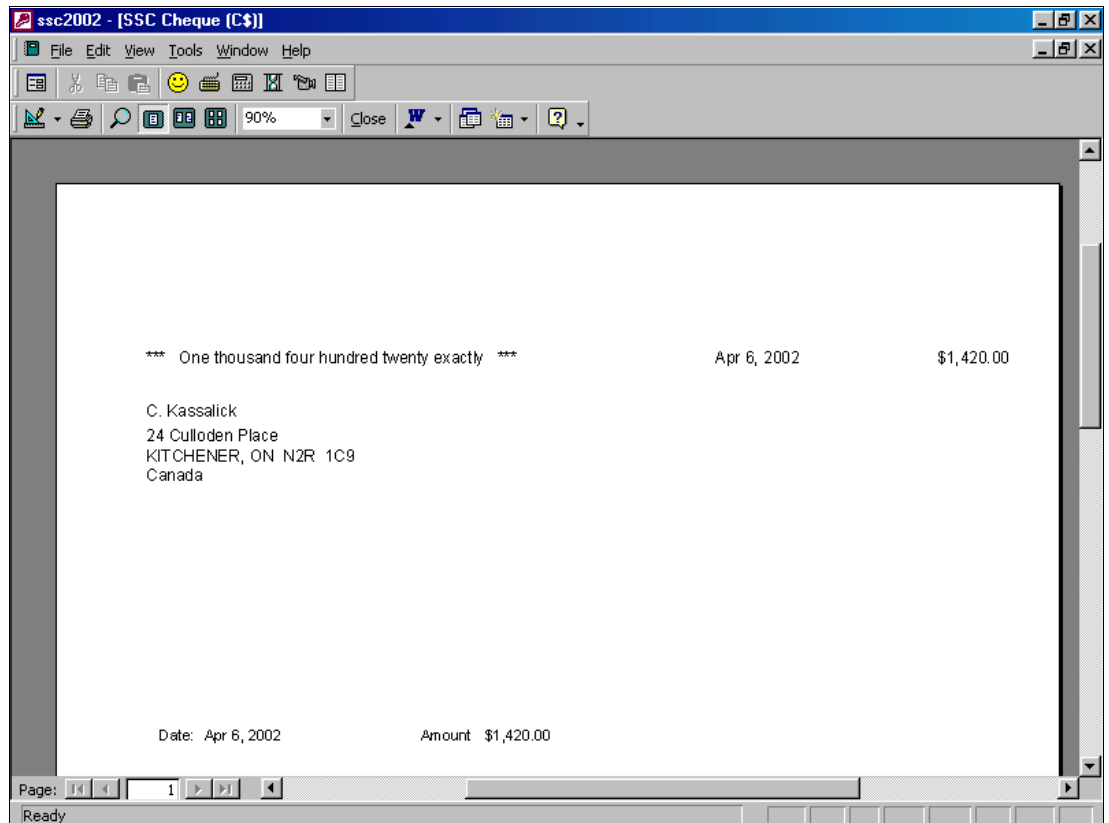

Cheque

Pre-made forms by NEBS
Business Products
(www.nebs.ca):

Figure 65
NEBS 11" Laser cheque
(form type 9085)

The **Cheque** button will allow a cheque to be printed for the current transaction onto a pre-printed blank cheque.

Rules to Print a cheque:

- < transaction must be posted
- < must have a 'valid' cheque number (numeric only; cannot contain any text or other symbols)

Viewing Buttons

There are several buttons down the center of the screen that present Accounting data in different formats:

- < **Company:** show each transaction for a specified *vendor*.
- < **Daily list:** show each transaction for a specified *date*.
- < **Payables:** show only transaction *types* that are *payables* **and** have a transaction date greater than or equal to a user-defined “as of” date (the default is ‘today’).

A fourth viewing form is **Account transactions** where each transaction for a specified account is shown. Double-click on an account code (either in the details listing or the account listing) to pop-up the list (see page 16).

The **Listings** radio buttons at the bottom of the Company and Daily List viewing forms are used to determine the *number* of transactions to be displayed:

- < view only Posted transactions
- < view only transactions that have *not* been posted yet
- < view All transactions

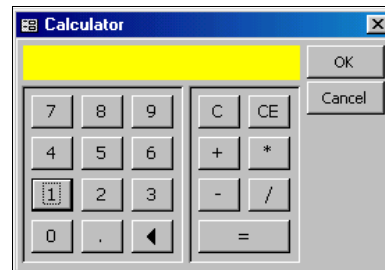

The **Payables** listing allows you to select an “as of” date.

Calculator

The **Calculator** button (**Alt-U**) pops up a calculator. This is useful if your calculator is not quite handy at the moment.

You can use the mouse to click the buttons on the calculator or use the numbers on the keyboard. The current number can be copied to the clipboard (**Ctrl-C**) and then pasted into an appropriate field in *The Church Executive*TM (**Ctrl-V**).

The general steps to generating a report in some format are:

- choose a form type (ie. type of report or query).
- identify the selection criteria by providing desired values into pre-defined field selections.
- select a sort order for the final output.
- *do it!* (this previews the report to the screen where it can then be printed, if required).

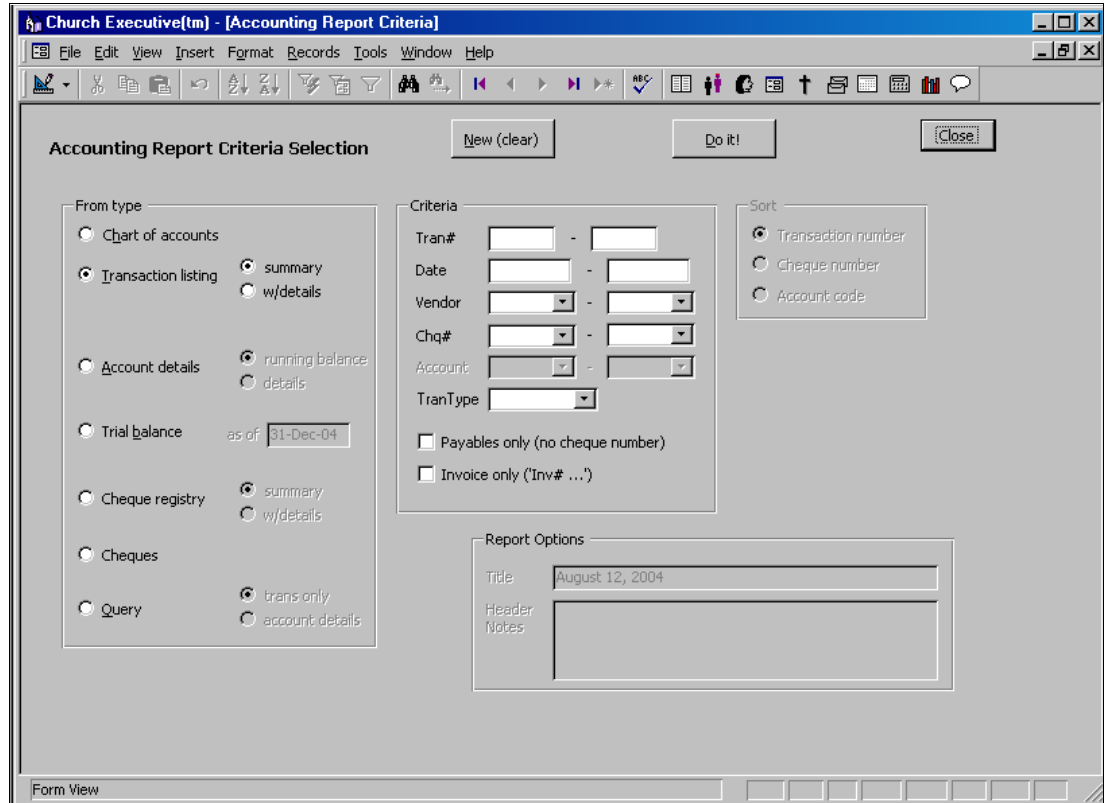

Figure 74 Accounting Report Criteria Form

New (clear)

Use the **New (clear)** button (**Alt-N**) to refresh all of the values on the Accounting report criteria form back to their defaults.

If you are running multiple queries, based on different criteria, then the New button will quickly revert the form back to 'blank' values.

Do it!

After you have chosen all of the desired criteria, destination, and sorting options, use the **Do it!** button (**Alt-D**) to generate the query/report.

Criteria values can be changed as often as you desire until you choose the **Do it!** button.

Form type

Seven basic types of reports are currently available:

- < Chart of accounts
- < Transaction listing (2 types)
- < Account details (2 types)
- < Trial balance
- < Cheque registry (2 types)
- < Cheques
- < Query (2 types)

The desired report is first presented in a *preview* mode. After previewing you can:

- < cancel the preview/print by pressing **Ctrl-F4** (the Windows “Close” keystroke) or pressing the *bottom* X in the upper right corner.
- < click the printer icon  at the upper left corner of the screen to print the report immediately to the default printer. Pressing **Ctrl-P** will invoke the Windows Print dialog box where you can select the number of copies to print, change printers, or print selected pages.

Cheques

This generates a batch of cheques.

- trans only
- account details

Query

The Query option (**Alt-Q**) presents the results as a *query* would.

Accounting Criteria Leaving all of the selection criteria fields *blank* will cause the *entire* accounting table to be selected. The *more* fields you provide information to, the *fewer* transactions will be selected.

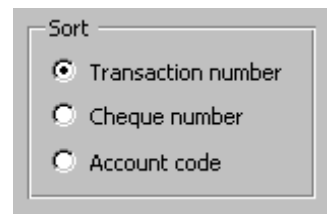

Criteria Fields

Tran#	enter a <i>range</i> of transaction numbers to include.	Tran# <input type="text"/> - <input type="text"/>
Date	enter a <i>range</i> of transaction dates to include.	Date <input type="text"/> - <input type="text"/>
Vendor	enter a <i>range</i> of vendor id numbers to include.	Vendor <input type="text"/> - <input type="text"/>
Chq#	enter a <i>range</i> of cheque numbers to include.	Chq# <input type="text"/> - <input type="text"/>
Account	enter a <i>range</i> of account numbers to include.	Account <input type="text"/> - <input type="text"/>
TranType	select a specific transaction <i>type</i> .	TranType <input type="text"/>
Payables only	check off if you only want <i>payables</i> — those entries that have <i>no</i> cheque number yet identified.	<input type="checkbox"/> Payables only (no cheque number)
Invoices only	check off if you only want <i>invoice</i> -type transactions to print.	<input type="checkbox"/> Invoice only ('Inv# ...')

Sort order Several different **Sort** order options have been provided.

The final query or report output will be presented in the order chosen.

The Sort options are only available for a Query; all other reports provide the necessary sort order that is appropriate for that report.

Sort

- Transaction number
- Cheque number
- Account code

Transaction number Sort by the transaction number.

Cheque number [If the Cheque field is blank (*null*), then use a value of 0 (zero), otherwise sort on the Cheque field (where any data that contains text is converted to 0), then the Transaction date and Transaction number fields.]

Account code Sort by account code.

Report Options The **Report Options** are only available for the Transaction listing, Account details, and Cheque registry form types.

Title The default Title is the current date. This information prints at the top of each page.

Title May 15, 2001

Notes This information prints only at the very beginning of the first page of the report.

Header Notes

As a reminder of what the report was based on, you might include information on the report's sort order and selection criteria.

Sample Accounting Transactions

Account transactions are either *debits* or *credits*.

In *The Church Executive™*, *debits* are a *positive* (+) while *credits* are a *negative* (-).

Buy furniture (cheque)

Newly purchased furniture is a **Fixed Asset**.

Monies are *leaving* a bank account.

A manual entry is made in the Accounting module

Ledger	Description	Debit (+)	Credit (-)
1020	Bank: Chequing		107.00
1560	Furniture	100.00	
2520	GST paid from church	7.00	

Buy office supplies (Visa)

Newly purchased office supplies are a **General Expense**.

Monies are *leaving* a bank account.

A manual entry is made in the Accounting module

Ledger	Description	Debit (+)	Credit (-)
1040	Bank: VISA account		107.00
5190	Office supplies	100.00	
2520	GST paid from church	7.00	

Pay phone bill (cheque)

Newly purchased stamps/collections/literature/supplies for re-sale are an **Inventory Asset** until such time as they are sold on an invoice — then they become sales revenue (see Invoice section sample).

Monies are *leaving* a bank account.

A manual entry is made in the Accounting module

Ledger	Description	Debit (+)	Credit (-)
1020	Bank: Chequing		107.00
5030	Telephone expenses	100.00	
2520	GST paid from church	7.00	

Monthly bank service charges

Your monthly bank service charges are withdrawn (automatically by the bank) from your bank account and “charged” against your corresponding expense account.

Monies are *leaving* a bank account.

A manual entry is made in the Accounting module

Ledger	Description	Debit (+)	Credit (-)
1020	Bank: Chequing		10.00
5050	Bank charges	10.00	

Petty Cash
 (“topping up”)

Newly purchased postage for sale or use is considered an **Inventory Asset**.

Monies are *transferred* one bank account to another.

A manual entry is made in the Accounting module

Ledger	Description	Debit (+)	Credit (-)
1020	Bank: Chequing		100.00
1070	Petty cash	100.00	

Miscellaneous expense from Petty Cash

Newly purchased book or magazine is considered a **General Expense**.

Monies are *leaving* a bank account (in this case, the Petty Case account).

A manual entry is made in the Accounting module

Ledger	Description	Debit (+)	Credit (-)
1070	Petty case		53.50
5210	Magazines/Journals/Books	50.00	
2302	GST/HST paid	3.50
