Report a mistake to the [editor](#).

The re-formatting and addition of new listings and perhaps 30% more information to this year's catalogue was quite an undertaking. Part of the re-formatting for this edition required a massive copy/paste of data from the Corel *Ventura Publisher* program to the Adobe *InDesign* program. Due to the transfer of data and new additions, I had expected a couple of minor mistakes to creep into the final product.

I obviously became too *comfortable* with the layout and contents of the catalogue while adding the enormous amount of new information, subsequent editing, and then proof reading. Some of the mistakes that occurred slipped by due to my familiarity with what I *expected* to see. More pairs of eyes during the proofing stage *might* have caught some of these.

However, that is no excuse for the following mistakes, many of which are due to the old 'copy/paste' scenario. Some of these mistakes made it past several pairs of eyes during the editing/proofing stage. Thanks to all who have sharper eyes than myself! **These mistakes have been corrected in my master copy for the '2007' edition, which should prove to be a virtually error-free edition, thanks to 'editors' like yourself.**

Some formatting 'mistakes', such as missing a '.00' after a value, or syntax and minor typos, have been reported and corrected; these are *not necessarily* listed below.

Other items noted are clarifications on specific listings.

Many thanks to those who have pointed out that the "new expanded information and modified layout of the catalogue far outweigh any errors that might exist." Your understanding is greatly appreciated. I still regret (more than you will ever know), and accept full responsibility for these errors...

[A special thanks to those who responded to the Letter to the Editor in the Jan 10th issue of *Canadian Stamp News*. Thanks for your appreciation towards to the changes and thanks for the 'sharp eyes' in detecting the most minor of mistakes - every correction makes future editions that much better.]
